Equation

The diagram illustrates the relationship between an 'Equation' and two data structures. At the bottom, a grey box labeled 'Equation' has two dashed purple lines extending upwards. The left dashed line leads to a white box labeled 'array< real, 2 >', and the right dashed line leads to a white box labeled 'multivec< 2, array< real, 1 > >'. Additionally, there are two solid purple arrows pointing from the dashed lines towards their respective boxes: one from the left dashed line to the 'array' box, and one from the right dashed line to the 'multivec' box. The labels 'v_s_' and 'v_bou_' are positioned near the dashed lines on the left and right respectively.
